

The UAW Retiree Medical Benefits Trust (the “Trust”) is making potentially impacted members aware of an event experienced by our call center vendor, Morley Companies, Inc. (“Morley”).

The incident began on August 1, 2021, when Morley’s data became unavailable, and discovered it could not access certain files and folders on its systems. It immediately launched an investigation into the incident with the assistance of third-party computer forensic specialists to determine the nature and scope of the incident. That investigation revealed that data may have been obtained from Morley’s digital environment. Morley then worked diligently to identify up-to-date address information to notify impacted individuals. On February 1, 2022, Morley started providing notice of this incident to potentially impacted individuals. The notice includes information about the event and about the steps that potentially impacted individuals can take to protect their information. It is important to note that Morley Companies is not aware of any misuse of your personal information as a result of this event.

Morley is providing notice to impacted Trust members by mail out of an abundance of caution and including an offer for free credit monitoring together with identity theft assistance and insurance. Morley is also notifying the U.S. Department of Health & Human Services’ Office for Civil Rights and relevant state authorities. If you have questions regarding this event, please call Morley’s dedicated assistance line at 1-833-806-0326. Additional information can also be found on Morley’s website: [www.morlynet.com/about/cyber-security-incident/](http://www.morlynet.com/about/cyber-security-incident/).

The Trust encourages potentially impacted individuals to remain vigilant against incidents of identity theft and fraud, to review account statements, and to monitor their credit reports and explanation of benefits forms for suspicious activity. The letter Morley will send to impacted individuals will provide advice on how to obtain free credit reports and how to place fraud alerts and security freezes on credit files.
